

# Task

## Statement

draw a "L" shape

200 steps for one side and 150 steps for the other

.....

## Simple loop

draw a cirle loop

Circle: 50 steps in length for each edge  
Turn 90 degrees right -> 4 circles

.....

## Learning into the loop and function

### Function\_Loop1

Square: 150 steps in length for each edge  
Turn 90 degrees right -> 4 squares

.....

## Function\_Loop2

Square: 150 steps in length for each edge  
Turn 90 degrees right -> 6 squares

.....

### Function\_Loop3

Square: 150 steps in length for each edge  
Turn 45 degrees right -> 8 squares

Square: 150 steps for each edge

turn right 45 degrees after each square

.....

## Function\_Loop4

Square: 150 steps in length for each edge  
Turn 60 degrees right -> 12 squares

Square: 150 steps for each edge

turn right 60 degrees after each square
